

PEA

Pedagogy Ecology and the Arts conference

5-6-7 September 2024 | Meran-o | South Tyrol | Italy

"peace"

Call for Proposals

<https://www.peaconference.org/peacall2024>

The three topics on which the conference is built are:

Pedagogy: *learning is the focus of the conference, especially education in its inclusive, empowering and developmental sense.*

Ecology: *ecological thinking – linking experiences, lives and systems (places, institutions, classrooms...) – underlies the organisation of education in a systemic perspective.*

Arts: *a qualitative enquiry that incorporates artistic processes and experiential dimensions as well as creativity into the approach is preferred to understand and articulate the inter-subjectivity of human experience.*

*This year, the PEA conference focuses on the concept of **peace**.*

The main questions we will address together are: What is peace?

What work on oneself is necessary to be a bearer, builder, “maker” of peace?

How can we create a peaceful environment?
